

# Your future in green energy software

Workplace: Pullach / München

With our solutions, Alelion has saved thousands of tons of CO2 and the potential is still very high. Doing more for the environment is one of our driving forces and something we want you to love. We now occupy a world-leading position by selling lithium ion-based energy storage systems to the largest truck manufacturers in the world. We stabilize the European power grid and trade on EPEX since July 2015. Our algorithms secure us an outstanding position in the energy storage industry. Since June 2016, we are listed on Nasdaq First North and face a very exciting future. We are 43 employees in Sweden and Germany, but now need to be more. If you want to work as a software developer in a fast-paced environment where you can improve the world, then this is for you.

## Your Work

You develop software for our devices and servers

- You develop Docker-based microservices
- You rapidly prototype with Python, node.js and whatever works best
- You live DevOps - from specification all the way to operations and back
- You make our high-security, high-availability cloud architecture evolve
- You improve and create algorithms for forecasting and optimization
- You work in sprints with others who love the latest technology

## Your profile

You are a passionate software developer

- You love making something worthwhile work
- You care for the world and those around
- You are passionate about programming
- You enjoy the process of creation
- You always learn about the latest technology
- You are pragmatic and use what works

## Your perspectives

We offer an exciting challenge in a highly motivated team - with flat hierarchies, quick decisions and lasting impact - as well as a workplace right outside Munich in the beautiful Isartal with excellent public transport. Home office days are supported, of course.
